Hobbies

Football   Gaming   Basketball

Gym   Travel

Projects

ViKER Project [https://github.com/LMGside/Viker-Project]
Produce a tool that facilitates bidirectional transformations between an Extended Entity Relationship (EER) diagram and an Abstract Relational Model (ARM).

- Developed the UI/UX using python
- Managed Project Testing (Unit testing, Version Control, Manual Testing and User Tests)

KhayaSite Project

Develop a web design for Whizz ICT Centre, used to promote Khayelitsha and underprivileged businesses found in Khayelitsha.

- Developed the UI/UX of the whole site using HTML, CSS, JavaScript and Bootstrap.
- Converted wireframes and prototypes into final web design.
- Improved the design of the existing web design.

Kumba Africa Projects (due to contractual agreement. I'm not allowed to share the code)

Developed a web dashboard for users to send their requests to the company and developed a blog site.

- Designed and developed the UI/UX using CSS, JavaScript, NodeJS, and Bootstrap.
- Improve the layout and functionality of the old blog page.
- Coordinated with backend developers to create a user-friendly signup system and responsive request submissions.

Work Experience

Kumba Africa
April 2019 - September 2019

A full-stack web developer role, where I worked on multiple web development projects during the time period. Implemented new UI with Bootstrap, NodeJS and JavaScript. Also created sign up forms for customers, using HTML, CSS and JavaScript.

Achievements

- Won Durban regional First Lego League (FLL) Championship and participated in the FLL SA National Championship in 2014.
- Qualified to the 3rd Round of the Harmony Gold South African Mathematics Olympiad
- Sub-committee for 2 years at UCT Residence.
